Expedition to Antarctica

Humpback whale near Pleneau Island

Wenesday, January 15th, 2008

At sea, between Ushuaia and the South Shetland Islands

1 97°. Ushuaia comes from a Yamana name which means « A bay protected from the west winds » (ushu = at the end, waia = bay)

AIRT

WIND FORCE 6

Sir Francis Drake (1540-1596) who managed the first British expedition around the world, discovered accidentally the place where the Atlantic and Pacific Oceans meet, today named the Drake Passage.

AIR T. 3°C

We encounter our first iceberg. It is a Tabular iceberg, probably fallen from an ice shelf and drifting here.

We can easily see the different snow layers that show the ice age.

Tabular Iceberg

We cross the Antarctic convergence and we see a rapid drop in the sea surface temperature, from around 6°C to 2°C. The temperature change is often associated with mist.
